

KPUB Utility Pole Audit

Kerrville Public Utility Board (KPUB) is constantly working to improve electric service reliability in the most cost effective manner possible. As part of this effort, KPUB has engaged Davey Resource Group (DRG) to perform work on our behalf.

DRG employees have begun work collecting system information on KPUB poles. This project is system-wide, and its primary purpose is to collect utility pole information that is used in billing attachment operators for use of KPUB assets as allowed by the FCC. The data collection is performed on a mobile device and should not take more than a few minutes at each pole location. Work completion is scheduled for December 31, 2017.

DRG is a very reputable company, and its employees will show the utmost respect to you and your property. Employees of KPUB's contractor, DRG, shall identify themselves as employees of the contracted company through badges and vehicle identification as shown.

Should have any questions or concerns about the work they have been asked to perform, please feel free to contact our offices at 830-257-3050.
